Intermediate Accounting Income Taxes - Quizlet

Essential Accounting for Income Taxes. Despite the complexity inherent in income taxes, the essential accounting in this area is derived from the need to recognize two items, which are: Current year. The recognition of a tax liability or tax asset, based on the estimated amount of income taxes payable or refundable for the current year. Future years. The recognition of a deferred tax liability or tax asset, based on the estimated effects in future years of carryforwards and temporary ...

Accounting for income taxes — AccountingTools

Intermediate accounting covers how to calculate the difference between financial and tax accounting. A major difference between the two is financial and tax depreciation. Financial depreciation takes the long-way home while tax depreciation takes the short cut through the vacant lot! So net income between the two will differ.

Old: Chapter 19: Accounting for Income Taxes ...

You figure income tax for financial reporting using the same tables as you do for tax reporting. Because the goal of this chapter is not to test your ability to accurately figure income tax expense using the IRC income tax tables, I use a constant tax rate of 40 percent in all examples (your intermediate accounting textbook uses a constant tax rate, too).
